High quality complete bathroom pods constructed off-site and delivered ready for installation

b-pod deliver high quality bathroom pods, constructed off-site and delivered ready to install, to meet a client's individual requirements and supported by a dedicated design team and supply chain.

Years of experience specialising in this area allows us to design and manufacture the most efficient and stylish bathrooms for a project using the highest quality materials.

- High quality modular solution for all types of building projects
- Time and cost saving benefits of off-site build and fit-out
- Flexible design and finishing options
- Quality control from concept to completion
- Delivery and install options

Construction

b-pods are built to a stringent standard to ensure a high quality consistent finish and excellent durability.

- Robust steel frame
- Floor depths to suit individual projects
- Fully finished internally, including tiled and decorated
- Fully tested, ready to connect M&E service

Design

b-pods are bespoke designed to meet the individual requirements of the building and the internal specification.

- Bespoke flexible design to suit individual client requirements
- Specification proposals and value engineering
- Can accommodate increased fire ratings and acoustic requirements
- Can incorporate BREEAM criteria
- Full construction, elevations and M&E drawings produced for each project

Manufacturing Quality

Build and fit-out are completed off-site to the highest quality and environmental standards.

- Manufacturing procedures to optimise efficiency and speed
- Factory testing for mechanical and electrical installation
- ISO9001 and ISO14001 accreditation
- Key stage manufacture inspections and final inspection with random quality checks

Finish

b-pod use state of the art materials to create our bathroom solutions which cannot be replicated by traditional on-site manufacturing.

No other system provides the benefits and finish of our unique solutions.

Delivery and Installation

b-pods are delivered to site fully fitted and finished ready for installation by our experienced team, which can be completed in a matter of hours.

- Installation service available
- Risk assessments and method statements to suit installation method
- b-pods are fully tested off site prior to delivery
- Full sign-off process to ensure client satisfaction

Benefits

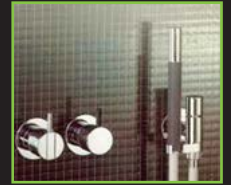

b-pod volume purchasing and economies of scale allow us to achieve a cost base which is far lower than traditional construction methods. Cost savings are immediately passed on as lower prices to our customers. Using pods greatly reduce key build costs

- Project build time significantly reduced and less risk of delays to programme
- Carbon footprint reduced because of fewer material deliveries to site

- Reduced risk of on site health and safety issues
- Less waste removal from site
- Supervision of skilled labour onsite is significantly reduced
- Level of quality achieved significantly reduces snagging issues and associated management costs
- Ease of procurement for client
- Quality bench mark agreed prior to delivery
- Reduced risk of fittings such as toilets and washbasins being damaged on site
- Strict deadlines are achievable

The Environment

Greater efficiencies mean that off site manufacturing is far better for the environment in terms of a lower carbon footprint, lower levels of waste and reduced transportation of components.
